Peerlist

About Me

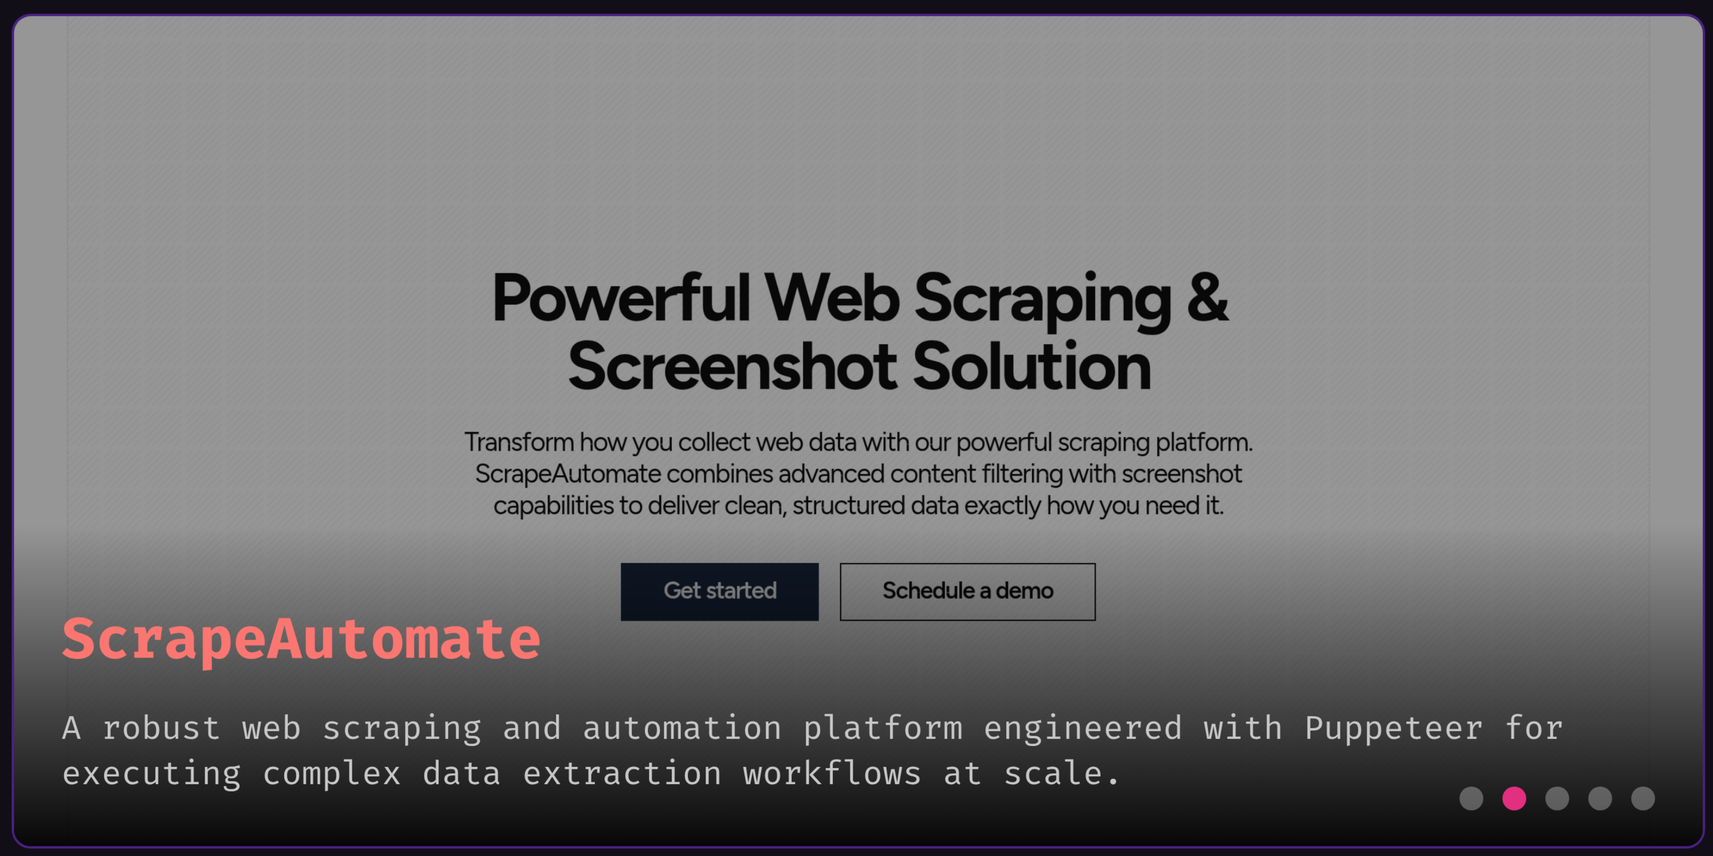

- [+] I'm currently working on building awesome web experiences.
- [>] I'm always learning new technologies and refining my craft.
- [*] Fun fact: I love building tools that automate the boring stuff.

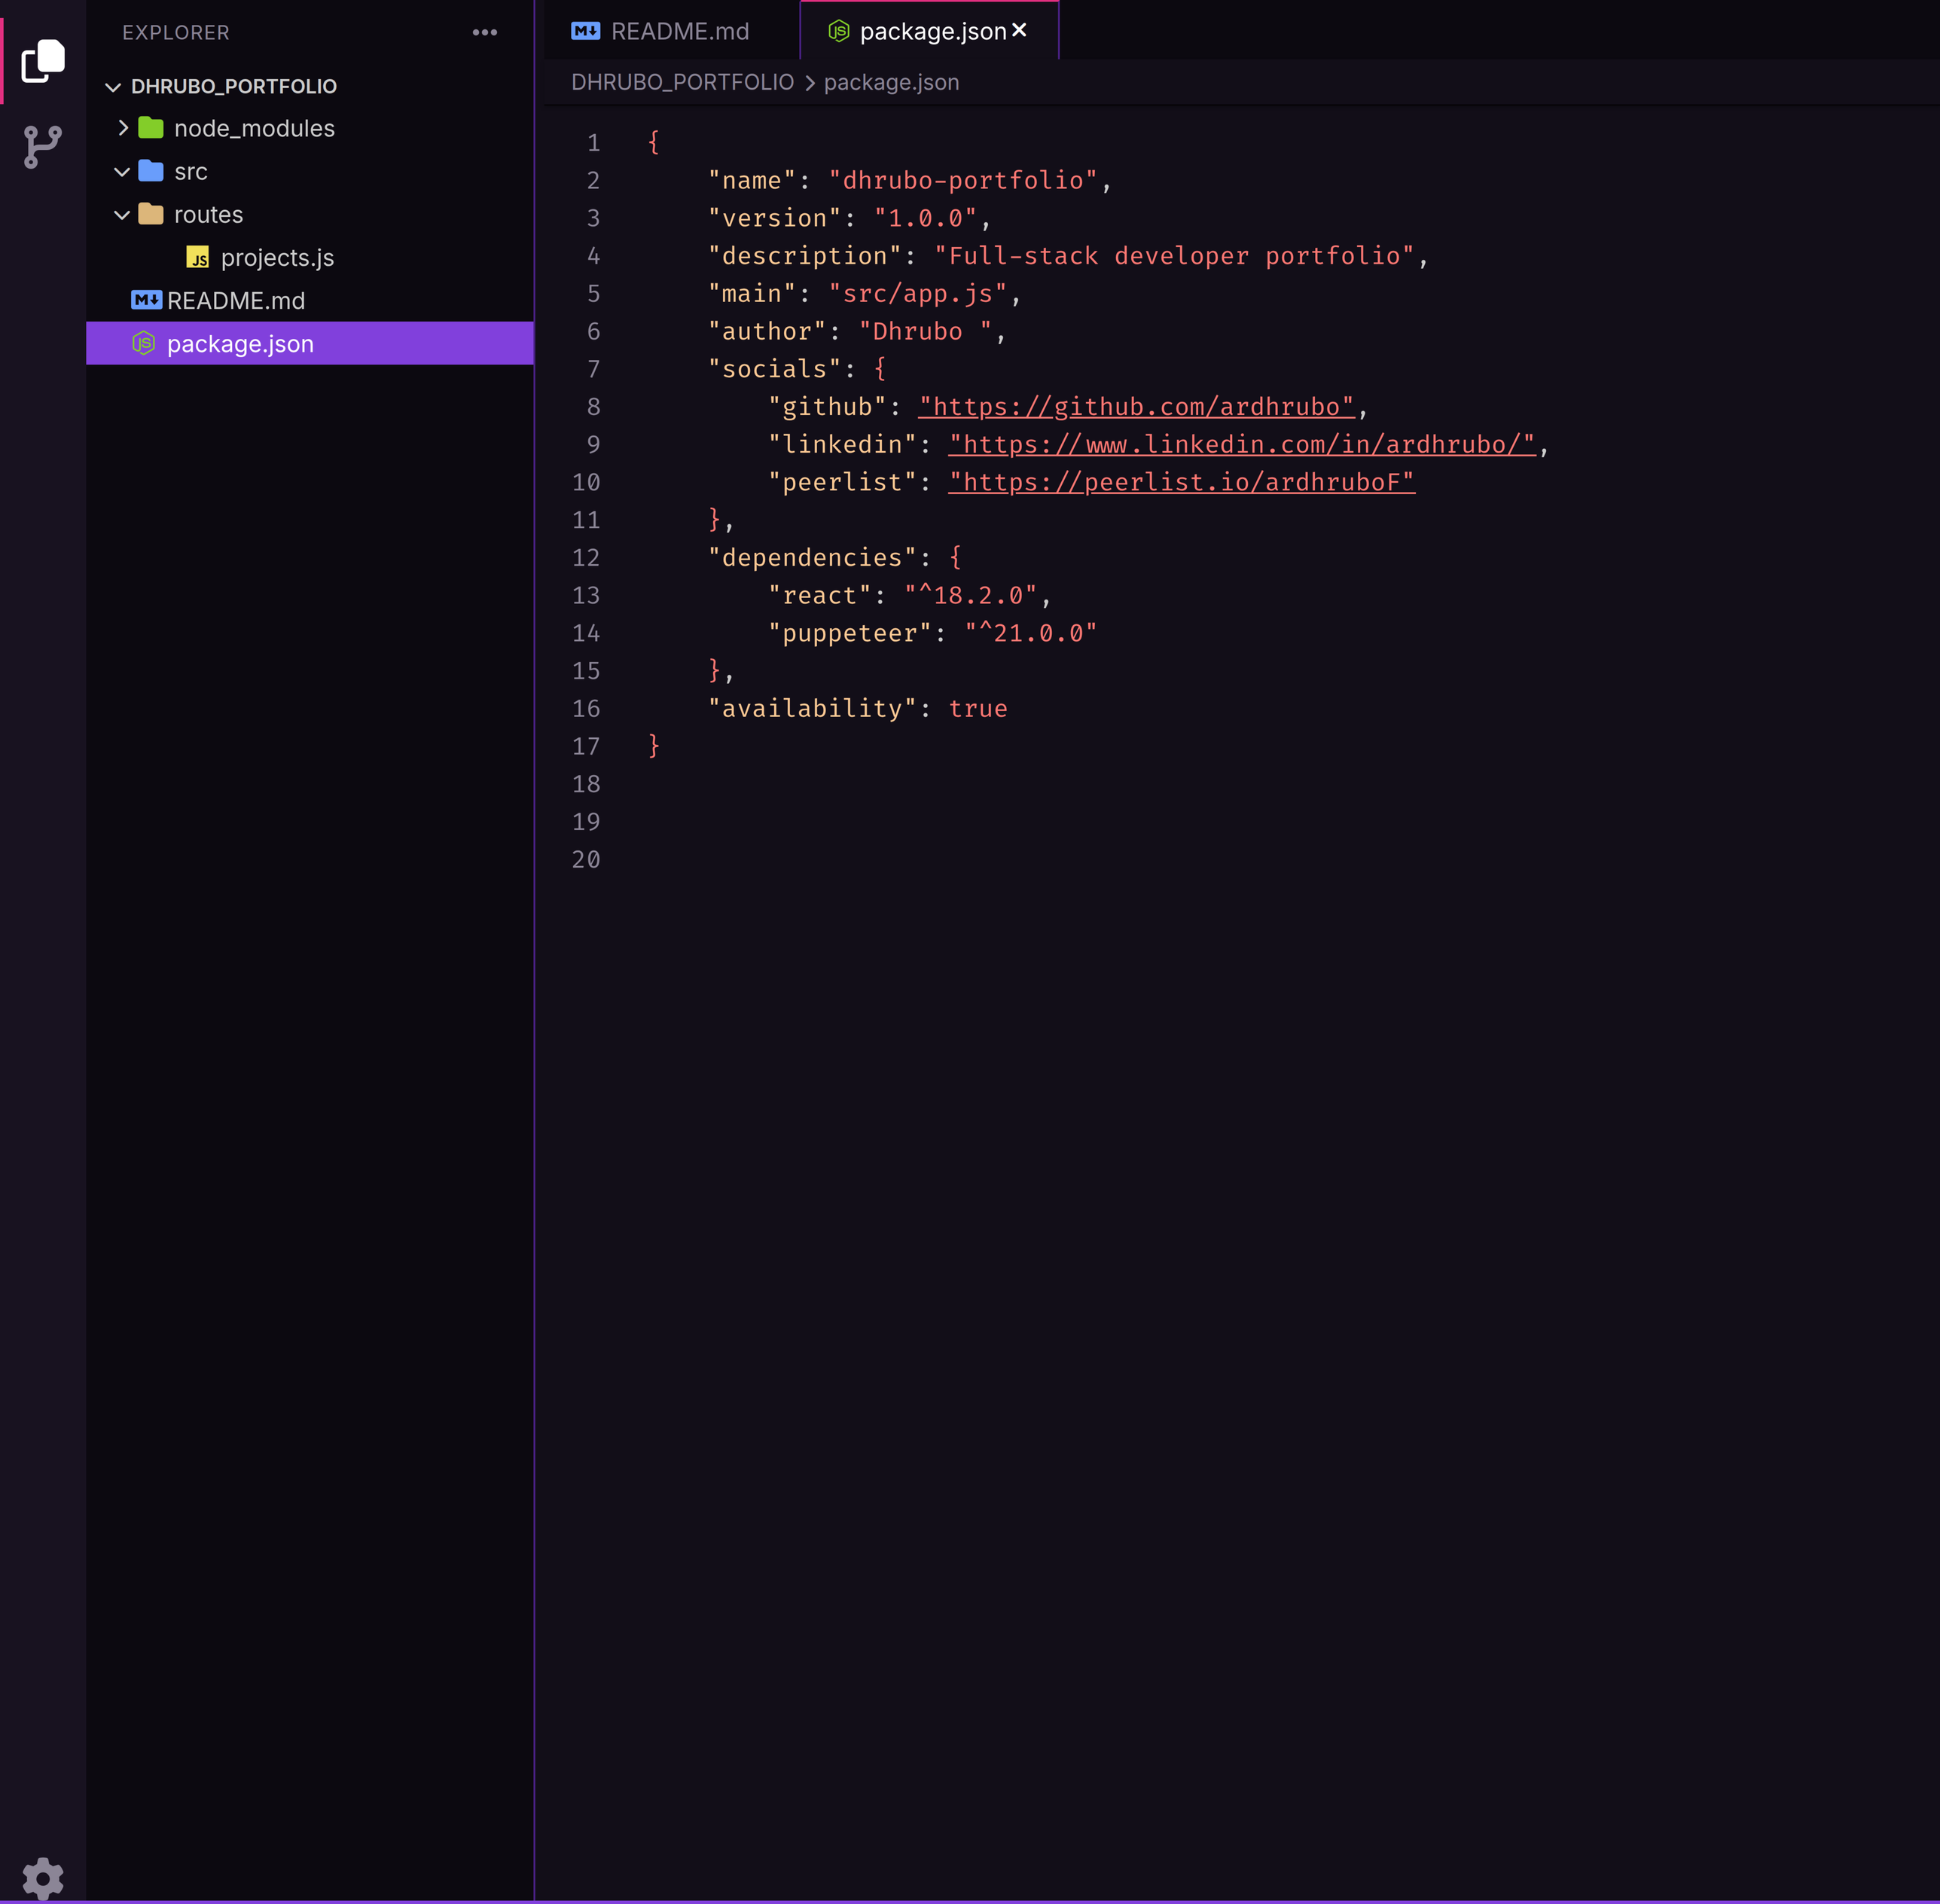

My Arsenal

- Frontend: HTML, CSS, JavaScript, React, Next.js, Vite
- Backend: Node.js, Python, Docker
- Tools: VS Code, Git, Terminal

Top Client Projects

I have shipped over **50+ projects** throughout my career. Below are some of my top client projects and tools that are actively making an impact:

```

Horizon Tax Solution

A professional tax and accounting services web application built for Australian clientele to handle seamless lead generation and consulting inquiries.

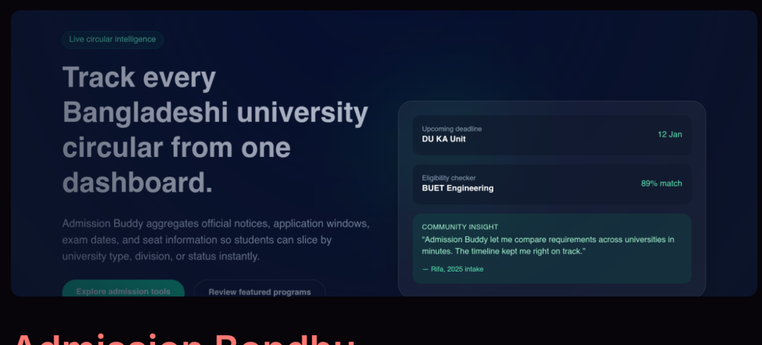

`Web`

ScrapeAutomate

A robust web scraping and automation platform engineered with Puppeteer for executing complex data extraction workflows at scale.

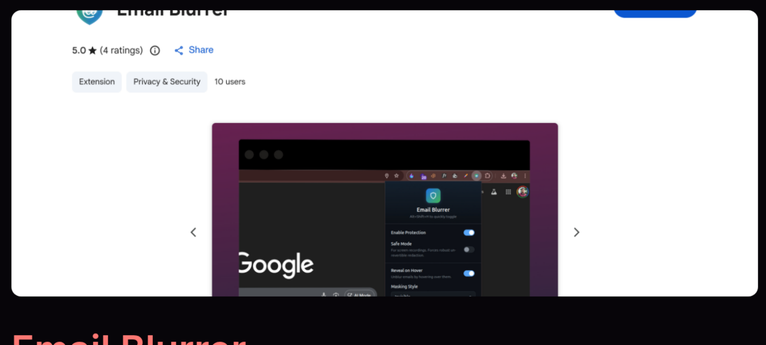

`Scraper`

Admission Bondhu

A comprehensive higher education portal designed to assist students in navigating the complexities of university admissions and enrollment processes.

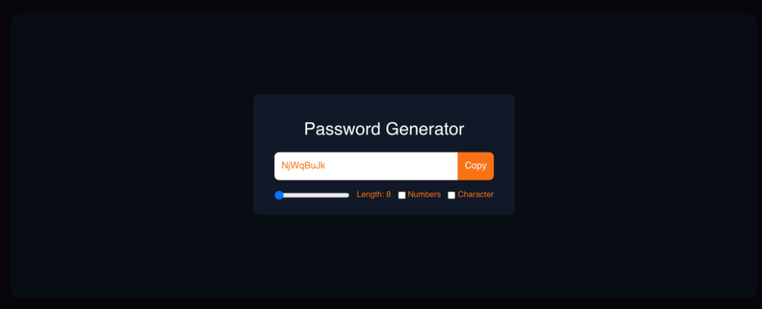

`React` `Node`

Email Blurrer

A privacy-centric Chrome Extension that automatically obfuscates sensitive email addresses on webpages.

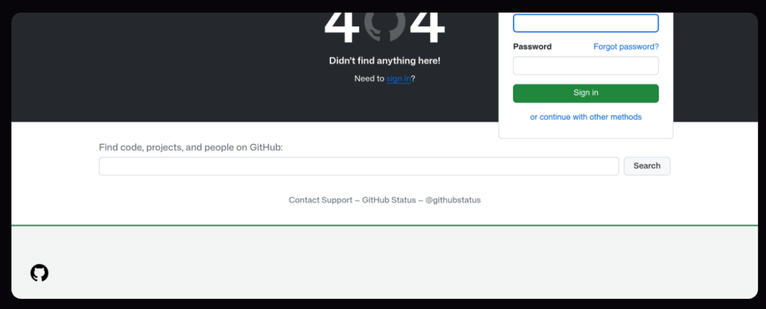

`Web`

Password Generator

A fast, customizable, and secure web application for generating strong cryptographic passwords locally in the browser.

`React`

Custom Bot

A Python-based automation bot tailored for specific repetitive tasks.

`Python`

CAREER CONTROL

DHRUBO_PORTFOLIO > src/routes/projects.js

CAREER HISTORY

feat(career): join Jagannath University as Academic Researcher

dhrubo committed on Mar 2026 a1b2c3d

- Developing Python-based Monte Carlo simulations for Probabilistic Health Risk Assessment (HRA).
- Performing DFT calculations for molecular modeling utilizing ORCA and Gaussian on Linux (Ubuntu).
- Quantifying uncertainty in environmental contaminants to advance beyond deterministic risk estimates.

feat(career): join CRILab as Researcher

dhrubo committed on Mar 2024 f4e5d6c

- Leading technical research initiatives and managing software development projects bridging chemistry and technology.

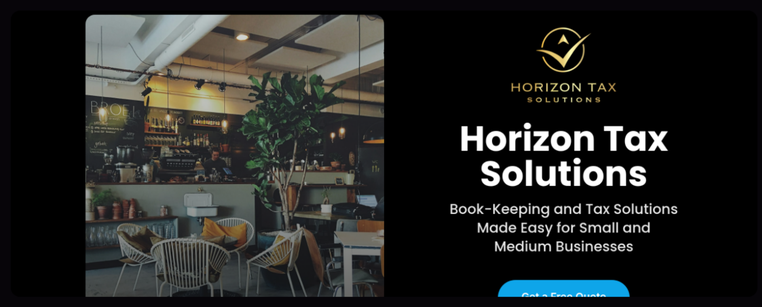

feat(career): start as Software Engineer at DataAutomators

dhrubo committed on Dec 2024 9a8b7c6

- Led full-stack development with a primary focus on the
